Wardha, Maharashtra, India

EDUCATION

MIT Academy of Engineering, Alandi
B.E. CSE (Data Science)
2025 – Present · Alandi, Pune

Jijamata Sabane Jr. College, Wardha
HSC — 70%
2023 – 2025

Sushil Himmatsingka Vidyalaya, Wardha
SSC — 93.60%
Till 2023

Mahila Aashram School, Wardha
Primary Education (Grade 1–4)
Early Years

SKILLS

- Python
- Problem Solving
- Communication
- Team Work
- Data Science
- Tech Exploration

LANGUAGES

English · Hindi · Marathi

INTERESTS

Data Science · AgriTech · Social Impact · Tech Exploration · Collaboration

PROFILE

Motivated and self-driven first-year B.E. Computer Science Engineering (Data Science) student at MIT Academy of Engineering, Alandi. Originally from Wardha, with a strong foundation in Python programming, problem solving, and effective communication. Passionate about creating real-world impact through technology — from building safety-focused hardware prototypes to co-founding a social impact AgriTech project. A curious learner, reliable team player, and someone who values respect, genuine growth, and humanity. Eager to contribute to meaningful projects and grow through hands-on experience as an intern or collaborator.

PROJECTS

GreenTech4 — Farmer-Consumer Platform
2026 – Present

Team Project · Team of 4 Members · In Progress

- Co-founding a social impact project with a mission to directly connect farmers to consumers, cutting out middlemen and ensuring fairer pricing for both sides.
- Working on ideation, feature scoping, and development of a technology-driven platform aimed at real community impact in the AgriTech space.

Seat Belt Alert System
2025

DEE Project · Hardware + Software Integration · Team Work

- Designed and built a safety-critical hardware prototype that detects whether a seat belt is fastened and triggers an alert if not — recognised by faculty for real-life relevance.
- Integrated sensor logic and circuit design; project received great appreciation for its practical engineering approach and quality of execution.

To-Do List Application
2025

Personal Project · Python

- Developed a simple productivity app for managing daily tasks, focusing on logic building, data structures, state handling, and understanding end-to-end app flow.

CURRENTLY LEARNING

- **Data Science Fundamentals**
  Data analysis, statistics & Python for data
- **Python Development**
  Building programs, logic & small applications
- **Project Collaboration**
  Joining teams on meaningful, impactful projects
- **Tech Exploration**
  Web basics to AI/ML concepts — learning broadly

ACHIEVEMENTS & ACTIVITIES

- **Faculty Recognition — DEE Project** — The Seat Belt Alert System was appreciated and recognised by faculty for its practical real-world application and quality of execution.
- **Academic Excellence — 10th Grade** — Secured 93.60% in the SSC examinations at Sushil Himmatsingka Vidyalaya, Wardha — a reflection of consistent hard work and focus.
- **Competition Participation** — Participated in various college-level competitions and events, gaining experience in teamwork, presentations, and competitive thinking.
- **Social Impact Initiative — GreenTech4** — Co-founded a team project using technology to bridge the gap between farmers and consumers, focused on real community impact.
